PerfectFitOrtho

YOU DESERVE A  
SMILE THAT YOU  
LOVE TO SHARE.

**Concinnity Aligners™**  
exclusively from Drake Dental Lab.

## HOW IT WORKS

- 1 Free Consultation.**  
 Learn how PerfectFitOrtho™ can help you enhance your practice through a complimentary virtual consultation.
- 2 Get Started. Free.**  
 Begin accepting patients for clear aligners, in person, or through our free Virtual Patient Exam widget customized for you. Approve cases risk-free. Receive patient starter kits from their first visit, allowing them to submit scans virtually as we monitor and guide through treatment.
- 3 Enhance Your Practice.**  
 Offer top-tier orthodontics with minimal chair time and get the support you need to grow your new offer seamlessly 24/7.

## WHAT IS CONCINNITY?

The Concinnity Aligners™ is a custom clear aligner system. They are a series of doctor (orthodontist or dentist) prescribed clear plastic removable aligners that are used as alternative to traditional orthodontic wires and brackets for the alignment of maloccluded or misaligned teeth. This series of aligner moves the teeth gently, and in small increments, from their original misalignment to their final treated position for improved dental alignment.

- ✓ FDA 510K Cleared
- ✓ Easily removed
- ✓ Clear & virtually invisible
- ✓ Effective
- ✓ State of the art materials
- ✓ Affordable
- ✓ Simple

Concinnity Aligners™ can be used to treat most mild and moderate orthodontic cases characterized by poorly aligned teeth. But your dentist's expertise helps guide your smile to the best outcome possible.

## WHY CONCINNITY ALIGNERS?

- ✓ We utilize next-generation materials designed for exceptional results.
- ✓ Our material resists staining for invisible treatment.
- ✓ The tri-layered aligner combines internal flexibility with external wear resistance.
- ✓ The Concinnity system offers flexible solutions for all ages.
- ✓ Aligners insert easily with 40% less rigidity than most competitors.
- ✓ Professional oversight through PerfectFit Ortho resulting in a smile your patient will love to share 24/7.

Crowding, spacing, overbites, open bites, and cross bites can often be treated with Concinnity. The trilayered Zendura FLX material enables a range of options that qualified clinicians know how to maximize.

### Comfortable Care

Advanced aligner material that's easy to wear reduces rigidity while increasing precision movement.

### Fast Results

Zendura FLX aligner technology aligns your smile with 50% more force than traditional materials.

### Professional Guidance

PerfectFit ortho will provide weekly virtual monitoring and patient feedback.

### Unmatched Support

Concinnity Aligners are backed by one of the nation's best laboratories with over six decades of experience.
