

Full Arch Digital Workflow Day

with Dr. Adam Hogan

Friday, June 14 | 8AM - 3PM EDT

Join us for a Full Arch Digital Day with Dr. Adam Hogan and experience YOMI Robot, iCAM, Trios and CoDiagnostiX in-person.

By Dr. Adam Hogan, Neodent, & Drake Precision Dental Laboratory

DESCRIPTION

Dr. Hogan will lecture on full arch procedures with digital technology. The topics and techniques covered include 3D imaging interpretation, brain-guided surgical protocols, surgical tips, implant placement, and full-arch conversion protocols. Additionally, Dr. Hogan will teach software tools for 3D printing, intraoral scanning, and photogrammetry.

LEARNING OBJECTIVES

- 1 Understand the scientific rationale and justification for the morse taper implants, guided surgery, full arch procedure.
- 2 Learn 3D printing.
- 3 Detail the steps of digital workflow on the day of surgery through delivery of a long-term provisional prosthesis.
- 4 Practice placement of dental implants and use of IOS and photogrammetry
- 5 NeoConvert hands-on workshop: the newest denture conversion system that reduces conversion time.
